

DIG Narrative Aesthetics, Strategies and Design in Time-Based Media

Kategorie: Methodologie / Kulturtechniken

Category: Methodology / Cultural techniques

Keywords: Formen der Analyse und Gestaltung, Erzähltechniken, Visualisierung

Keywords: Forms of analysis and design, narrative techniques, visualization

This course will give an introduction and an overview into the aesthetics, strategies and design of narratives in time-based media. The idea of narrative is more than just storytelling; it invites us to think about the design of structures, processes and systems.

We will analyse good old narratives and compare different forms of storytelling.

Inhalte	Narrative is an important concept in the design and creation of new media. Far more than just story-telling, the idea of narrative invites us to think about structures, processes and systems essential to time-based organisation and spatial arrangement. This course examines narrative strategies for different kinds of creative situations: from photo sequence to moving image aesthetics, montage theories for time-based media, from fiction and documentary film, animation to video experiments for ubiquitous screen contexts, game, hypertext, and immersive environments.
