

DIG Theorie 1.2 VIAD Inter-Action Design

Inter-Action Design is an introduction into the interaction design, its history, concepts and future perspectives, from user-centred to life-centred design.

Angebot für

Bisheriges Studienmodell > Design > Bachelor Design > Interaction Design > 1. Semester

Nummer und Typ	BDE-BDE-T-VS-1002.21H.001 / Moduldurchführung
Modul	Theorie 1. Semester VIAD
Veranstalter	Departement Design
Leitung	Verena Ziegler
Zeit	Mo 27. September 2021 bis Mo 13. Dezember 2021 / 10:30 - 12:30 Uhr
ECTS	2 Credits
Voraussetzungen	Keine
Lehrform	Theory in Context (field exercises / excursions) Online-Lectures via Zoom
Zielgruppen	Vertiefungsspezifisches Modul VIAD, 1. Semester
Lernziele / Kompetenzen	We would start our journey in Interaction Design in a manner of Alchemic wondering about the world, to stimulate first thoughts on the role of design, human and technology. How will we might become a designer and what do we face in the university as well as the outside world? Therefore, we will investigate in designing within room and space - discussing about our local surroundings and global interdependencies. We will dive through different episodes of becoming an Interaction Designer – adequate to the stages of becoming an Alchemist – with all the expectations, experiences we learn, and reflections and actions on it. This seminar should give a fundamental base for the upcoming semesters interweaving theory and practice into discourse.
Inhalte	what is analog? what is digital? what is digitalisation? what is an interface? what is an affordance? what is inter-action? what is ecological thinking? what is life-centred design? Students will learn about the interaction design history, concepts and future perspectives. We will discuss a specific IAD approach grounded on the idea of Inter-Action and new thematic areas: Complexity, Diversity and Otherness.
